Agney Praseed

(+49)15227153318

Education

Brandenburg University of Technology (BTU), Germany **Apr 2025 – Present**
Master of Science in Artificial Intelligence

National Institute of Technology Puducherry, India **May 2022**
Bachelor of Technology in Computer Science and Engineering
CGPA: 7.73/10

Professional Experience

Publicis Sapient, Bengaluru, India June 2022 – February 2024
Software Development Engineer

- Developed full-stack features for an enterprise platform using Java/Spring Boot, Angular, and PostgreSQL.
- Designed and implemented REST APIs in Spring Boot to connect workflows with the Angular frontend and PostgreSQL backend
- Implemented and integrated authentication microservices into an enterprise assessment platform, supporting secure access across application workflows
- Migrated PostgreSQL database components to Azure, supporting deployment and integration with the enterprise platform.

Technical Skills

Programming Languages: Java, C++, Python, JavaScript, TypeScript, Bash, SQL
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git, Docker, AWS, Azure, JMeter, JIRA, Confluence, Elasticsearch
Libraries/Frameworks: PyTorch, ReactJS, Redux, Scikit-learn, pandas, Hugging Face Transformers, Spring Boot, Node.js, Express.js, OpenAI Agents SDK

Projects

NemoDoc : AI Document Assistant with Agents

- Built a full-stack AI document assistant enabling document search, citation-backed answers, and study material generation.
- Orchestrated tool calling agents using the OpenAI Agents SDK for research planning, parallel research, and review workflows.
- Developed scheduled background tasks and persistent execution traces to inspect agent tool calls, errors, and results.

GPT-2 : Language Model Training Pipeline

- Implemented GPT-2 from scratch in PyTorch, building causal multi-head self-attention, positional embeddings, transformer blocks, and autoregressive text generation.
- Developed an end-to-end training pipeline with BPE tokenization, AdamW optimization, learning-rate scheduling, gradient accumulation, and model checkpointing.
- Evaluated model performance using HellaSwag benchmarks; implemented temperature scaling and top-k sampling for text generation.

Travel Aggregator : Cloud Native Travel Booking Platform

- Architected and developed 3 independently deployable microservices for search, booking, and payment utilizing Spring Boot, Node.js, and MySQL on AWS RDS.
- Integrated AWS OpenSearch, OAuth 2.0/JWT authentication, and payment workflows across the platform.
- Integrated Google Maps API for real-time geolocation, place autocomplete, and duration calculations for bookings.
- Containerized the application, configured Jenkins CI/CD, and performed JMeter load testing for up to 3,000 concurrent users.

Certificates

Microsoft Certified: Azure Data Scientist Associate February 2026

AWS Certified Cloud Practitioner

Deep Learning Specialization (Coursera)

Java Programming (University of Helsinki**)**

Languages

- **English**: C1 - Advanced (Full Professional Proficiency)
- **German:** A2

Interests

- Football (viewing and competing)
